SEO & AI VISIBILITY · BASELINE REPORT

LeadFlow Automation

https://www.leadflowautomation.net/ · market: United States, English

Report date: 2 November 2026 Prepared by: LeadFlow Automation · SEO Desk

Data: Google desktop results, Lighthouse, ChatGPT · Gemini · Google AI Overviews · Perplexity

At a glance

SITE HEALTH
100
19 pages crawled · at least 0 with warning-level issues

MOBILE SPEED
97
Homepage Lighthouse, mobile · main content in 2.4 s

GOOGLE VISIBILITY
0/25
tracked keywords in the top 20 · One term ranked in the US index; none of 25 tracked in top 20

AI VISIBILITY
0%
of 47 AI answers name the brand · Named in 0 of 47 answers; cited only when asked by name

Scores are 0–100 unless stated. Site health = share of crawled pages free of warning-level issues. Mobile speed = Google Lighthouse performance score of the homepage on a phone. Google visibility = tracked keywords where the site appears in the top 20 results. AI visibility = share of AI-engine answers that name the brand.

Verdict

> Technically excellent, commercially invisible. Lighthouse 100/97 and only cosmetic issues, but the domain ranks for a single keyword in the US index ('lead flow' at #82), none of the 25 tracked service terms are in the top 20, and the brand query 'lead flow automation' is owned by an unrelated CRM product called Lead Flow. AI engines gave 47 answers to vendor-search prompts and named us in none; they cite YouTube, LinkedIn, The Manifest, aiagencyradar and aiagencies.eu directory pages instead. The site is only cited when the prompt already contains our name.

Do these three first

1. Create or claim profiles on The Manifest, Clutch, aiagencyradar.com and aiagencies.eu with the homepage positioning sentence
2. Add three service pages: RAG development, AI agent development, AI automation agency, each with scope, price bands and the two case studies
3. Use 'LeadFlow Automation' as one consistent name in titles, add Organization schema, link the YouTube channel, LinkedIn page and GitHub to the site

1. Site health

19 pages crawled on 2 November 2026. 2 issue types found; warning-level issues affect at least 0 pages. Agency site: production software with AI agents inside (RAG knowledge systems, agent teams with approval gates, ERP/CRM integration). 19 pages incl. ~15 blog posts.

Severity	Issue	Pages
INFO	Title longer than Google shows	10
INFO	Description too short	3

Speed and quality (Google Lighthouse)

Page	Performance	Accessibility	Best practices	SEO	Main content shown after	Layout shift
Homepage, mobile	97	96	100	100	2.4 s	0.02

Homepage, desktop	100	93	100	100	0.5 s	0.06
Average of 4 sampled pages, mobile	89	92	100	100		

Google treats “main content shown after” (Largest Contentful Paint) above 2.5 s and layout shift above 0.1 as poor. Slowest sampled pages on mobile: /blog/ai-agent-for-sales/ (62, 5.6 s).

2. Google rankings

25 keywords tracked weekly (United States, English, desktop, top 20 results). Live baseline check on 2 November 2026. One term ranked in the US index; none of 25 tracked in top 20.

Ranking now (top 20)

No tracked keyword is in the top 20 yet.

Opportunities: tracked keywords with demand where the site is not in the top 20

Keyword	Searches / month	Demand	Difficulty (0–100)
ai automation agency	4,400		19
ai software development company	720		34
ai agent development company	590		9
ai agent orchestration	590		8
ai automation consultant	590		0
ai agent development services	480		0
agentic ai development company	260		14
custom ai agent development company	90		0
rag development services	90		0
human in the loop ai agents	70		22
mcp server development	50		0
ai workflow automation services	40		7
rag consulting	30		0
custom ai agents for business	20		1
production ai agents	10		13

Tracked without volume data (too new or too specific for Google’s keyword database): ai agents for sales operations, ai knowledge base for engineering teams, claude agent development, enterprise rag implementation, erp ai agent integration, lead flow automation, leadflow automation, llm integration services, private ai deployment services, rag chatbot development.

3. AI visibility

We asked the four main AI answer engines 12 questions a prospective customer might ask (listed in the appendix) and checked whether the answers name **LeadFlow Automation**, name its competitors, and which websites they cite. 47 answers were collected (1 questions returned no AI answer).

Who the engines name

Brand	Mentions	Answers
LeadFlow Automation		0 of 47
10clouds.com		3 of 47
leanware.co		1 of 47

The brand was not named in any neutral answer.

By engine

Engine	Answers	Name LeadFlow Automation	Cite the site
ChatGPT	12	0	1
Gemini	12	0	1
Google AI Overviews	11	0	1

Perplexity	12	0	1

Websites the engines cite for these questions

Website	Answers citing it	Questions
youtube.com	7	7
aiagencyradar.com	5	3
themanifest.com	5	3
linkedin.com	5	5
keyholesoftware.com	4	2
phosailabs.com	4	2
aiagencies.eu	4	2
leadflowautomation.net	4	1
reddit.com	4	4
aws.amazon.com	3	3

These are the places to be present or quoted if the brand is to appear in AI answers.

4. Links to the site

30 backlinks from 30 referring domains. No individual referring domain is attributed in the profile yet, which means the counted links carry little weight.

5. Action plan

#	Action	Effort	Impact	Owner
1	Create or claim profiles on The Manifest, Clutch, aiagencyradar.com and aiagencies.eu with the homepage positioning sentence	3–4 h	High	Marketing
2	Add three service pages: RAG development, AI agent development, AI automation agency, each with scope, price bands and the two case studies	2 days	High	Content + dev
3	Use 'LeadFlow Automation' as one consistent name in titles, add Organization schema, link the YouTube channel, LinkedIn page and GitHub to the site	2 h	Medium	Dev
4	Shorten 10 blog titles to 60 characters and lengthen 3 descriptions to 70+	1 h	Low	Content
5	Fix the layout shift on the 'AI agent for sales' post (an unsized image or embed)	30 min	Low	Dev

Tracking continues weekly; the next report will show movement against this baseline.

Appendix

- vendors for AI agent teams in sales and operations (Vendor search)
- who builds Claude-based agents for businesses (Vendor search)
- who can build a RAG knowledge system for my engineering team (Vendor search)

Method and glossary

Rankings: live Google search from a United States desktop location, personalisation off, top 20 results; repeated weekly. **Searches / month:** Google's average monthly search volume for the market. **Difficulty:** 0–100 estimate of how hard the first page is to reach; under 30 is attainable for a small site. **Lighthouse:** Google's page-quality tool, run on a sample of pages on a simulated phone and desktop. **AI visibility:** each question is asked once per engine; a "mention" is the brand name in the answer text, a "citation" is the site in the answer's sources. **Links:** third-party backlink index snapshot; counts change as the index refreshes.
